

# United States Army Program Executive Office Missiles and Space

Huntsville, Alabama

July 2006

## Description

The PEO Missiles and Space provides centralized management for all Army tactical and air defense missile programs and selected Army Space programs. The PEO was established in January 2005 with the merger of the PEO Air, Space and Missile Defense and the PEO Tactical Missiles. The PEO is responsible for the full life-cycle management of assigned programs.

The portfolio of programs assigned to the PEO Missiles and Space spans the full spectrum of the acquisition process from system development to production, fielding, sustainment, and eventual retirement from the force. A number of programs are joint and are being developed with the other services. Two programs within the PEO are international programs, with other countries sharing in the development as full partners.

In addition to specific acquisition programs, the PEO also manages the Single Integrated Air Picture Initiative. Together with the Integrated Air and Missile Defense Program, this initiative will provide a single view of the air space above the battlefield and the linkage between systems that will allow the commander to respond

to threats with a fully integrated fire control solution matching the best sensor with the best weapon to engage each threat.

As part of the reorganization of the acquisition community, the PEO Missiles and Space became part of the Life Cycle Management Command at Redstone Arsenal, AL. This command relationship will enhance the PEO's ability to provide the world's finest support to our warfighters while continuing the Army's modernization.
